Quality Assurance Technician

Ref: ING251
Location: Oxford
Position Type: Full-time/Permanent

We are searching for a Quality Assurance Technician to join our Quality Assurance team. Working with the team, the Quality Assurance Technician will be responsible for writing and executing the Test Cases for new Software Developments, manually and using Selenium WebDriver and JMeter. Reporting issues found with the Software and retesting the resolved issues. The testing methodology will be the VV Model. The Software Development methodology is Agile. Testing will be against both Client Server and Web Applications.

This position requires business acumen, technology knowledge, and the ability to work closely with the Product, BA and Development Teams.

The role is ideally suited to someone with a technology background in Quality Assurance and Quality Control in a commercial software development house along with relevant experience in a complex systems and business environment for both Web Applications and in a Client Server Environment.

The Successful Candidate will need:

- Hands on experience in the production of Test Cases for manual execution
- Hands on experience in the production of scripts using Selenium WebDriver and JMeter
- Ability to communicate at all levels and to work well as part of a team
- Excellent oral and written communication skills, ability to communicate and explain concepts & issues to engineers, product managers and BAs
- Proficient in MS Office Suite
- ISEB Qualification in Software Testing
- Some knowledge of SQL Server, .NET and Java an advantage
- Publishing Industry knowledge highly desirable
