## Contracts, Rights and Royalties

Unlocking your  
contract information

Contracts, Rights and Royalties (CRR) helps improve your copyright compliance and effectively monetise your intellectual property through better rights and royalty management. It forms one of three highly configurable, content agnostic software modules that make up the Ingenta Commercial suite.

## One version of the truth

Your contracts hold the objective truth for all your activities and responsibilities. Ingenta CRR standardises all your contracts across the organisations. With powerful templates, a central contract repository and complete interlinking of contracts to right and royalties, you can have the confidence you're working from one version of the truth. A contract centered process adds IP data integrity from contract creation to available rights, through to contributor royalty calculations and payments.

With a clear picture of what rights you own and which are available, through integrated contracts, you're in a great position to sell and market more efficiently. Managing the whole process in CRR you can better control your rights income, incoming and outgoing permissions and make sure you're copyright compliant.

With all the nuances of your contracts understood by the system they're stored in, royalty payments become simple with automated calculations and flexible creation of statements, including on demand draft copies. You can reconcile royalty payments across sales and finance systems and give better service to contributors by offering web portal access to view contracts, statements and sales.

## Key features

Create and manage detailed contracts.

Buy rights and sell rights.

Manage the payment of advances and royalties.

Make complex royalty calculations.

Create statements.

Manage income generated from licencing IP (intellectual property) and selling subsidiary rights.

A comprehensive permissions system enables permissions clearance teams to track permissions acquired across multiple products along with usage and financial information.
