

JAVA/JEE Software Engineer

Ref: ING293

Location: US - Work from Home

Position Type: Full time/Permanent

A Java/JEE Software Engineer is required by a leading provider of Publishing Solutions. Based in Oxford, UK (or WFH in UK/US), you will be responsible for providing customer support, new enhancements and resolution of issues. This is a role within the Content Platforms division.

The successful candidate will be required to learn the application and become a productive member of the team, supporting a variety of customer websites that are hosted on-prem and in AWS.

Regularly show demonstrable progress against the team and individual objectives set by the Engineering Manager, with the ability to deliver on time, to budget and specification.

The successful applicant should preferably have 3 years suitable experience, be dynamic and enthusiastic with a passion to learn and desire to advance their career.

The Successful Candidate will :

- Be part of the team responsible for development, modification, and support of software for the publishing industry, utilizing industry standard and proprietary development tools
- Be involved in the reporting, investigating, and resolving of software and client issues
- Translate user needs into functional requirements and assist with business specifications, including process and workflow changes
- Be responsible for documentation of system changes
- Have willingness and ability to learn as this is, in part, a role where training will be given
- Possess good communication (written and verbal) and strong organizational skills
- Be self-motivated and able to work independently on specific tasks
- Be able to work within a group whilst balancing multiple priorities and deliver tasks to an agreed schedule
- Have a keen desire to learn and develop new skills & knowledge
- Be able to work with an international, geographically dispersed team
- Have knowledge of Content Standards like NLM, JATS, ePub, ONIX (Desirable)
- Complete accurate timesheets on a weekly basis

Knowledge of:

- XML
- XSLT
- AWS (Desirable)
- RDF (Desirable)
- Sparql (Desirable)

Technical Skills:

- Java JEE
- SQL
- Spring/Spring Boot
- Unix/Linux (bash)
- SVN/Git

General Skills:

The candidate should have experience of working on production JEE projects. You will possess the ability to analyse user requirements and ideally have experience of all aspects of the SDLC. Any experience in a Tier 2 or Tier 3 support role is desirable.

Benefits:

We offer a comprehensive benefits package including:

- Healthcare Scheme
- 401 (k) Plan
- Flexible working
